QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor
D. H. McINTOSH

Vol. **103**, 1977

ROYAL METEOROLOGICAL SOCIETY
JAMES GLAISHER HOUSE, GRENVILLE PLACE,
BRACKNELL, BERKSHIRE RG12 1BX
1977

CONTENTS OF VOLUME 103

PAGE

R. HIDE—Experiments with rotating fluids—Presidential Address 1

JULIA WALKER and P. R. ROWNTREE—The effect of soil moisture on circulation and rainfall in a tropical model 29

J. E. SIMPSON, D. A. MANSFIELD and J. R. MILFORD—Inland penetration of sea-breeze fronts 47

STEFAN HASTENRATH and LEON HELLER—Dynamics of climatic hazards in northeast Brazil 77

A. A. WHITE—The surface flow in a statistical climate model—a test of a parameterization of large-scale momentum fluxes 93

D. H. BACHE and M. H. UNSWORTH—Some aerodynamic features of a cotton canopy.. 121

A. BUZZI and S. TIBALDI—Inertial and frictional effects on rotating and stratified flow over topography 135

K. S. TSUI, G. J. BELL and P. C. W. FUNG—Change in intensity of typhoons which develop cloud-plume outflow aloft 151

G. B. TUCKER—An observed relation between the macroscale local eddy flux of heat and the mean horizontal temperature gradient 157

R. WHITE—Intensity plots of the parhelia 169

T. G. J. DYER—On the application of some stochastic models to precipitation forecasting 177

CLAUDIO TOMASI and RODOLFO GUZZI—Experimental comparison between visible and near infrared attenuation of solar radiation in hazes and fogs 191

A. K. LO—Boundary layer flow over gentle curvilinear topography with a sudden change in surface roughness 199

Notes and Correspondence

A. J. SIMMONS—Baroclinic instability in the summer mesosphere 211

K. J. WESTON and H. CATTLE—Comment on the paper 'Effects of aerosol on the local heat budget of the lower atmosphere' by J. Glazier, J. L. Monteith and M. H. Unsworth 215

A. K. BETTS—Comments on 'Budget studies of heat flux profiles in the convective boundary layer over land' by H. Cattle and K. J. Weston. With Reply.. 216

Corrigenda 218

Reviews

The upper atmosphere in motion, C. O. Hines (R. J. Murgatroyd); *World survey of climatology, Volume 12, Climates of Central and South America*, W. Schwerdtfeger (J. S. Hopkins) 219

Elections to Membership 221

Obituary Notices 222

H. C. DAVIES and R. E. TURNER—Updating prediction models by dynamical relaxation: an examination of the technique 225

C. G. COLLIER—The effect of model grid length and orographic rainfall 'efficiency' on computed surface rainfall 247

C. N. DUNCAN—A numerical investigation of polar lows 255

M. J. BADER and W. T. ROACH—Orographic rainfall in warm sectors of depressions 269

A. J. ILLINGWORTH and J. LATHAM—Calculations of electric field growth, field structure and charge distributions in thunderstorms 281

J. LATHAM and R. L. REED—Laboratory studies of the effects of mixing on the evolution of cloud droplet spectra 297

T. W. CHOULARTON and J. LATHAM—Measurements of the deposition coefficient for ice, and its application to cirrus seeding 307

R. S. HARWOOD and J. A. PYLE—Studies of the ozone budget using a zonal mean circulation model and linearized photochemistry 319

A. S. THOM and H. R. OLIVER—On Penman's equation for estimating regional evaporation 345

F. R. HAYES—A new parameterization of deep convection for use in the 10-level model 359

Notes and Correspondence—

S. B. IDSO—A note on some recently proposed mechanisms of genesis of deserts .. 369

K. R. SAHA and S. N. BAVADEKAR—Moisture flux across the west coast of India and rainfall during the southwest monsoon 370

P. G. BAINES—Comments on the paper 'On the asymmetry of the land-breeze sea-breeze circulation' by R. A. PEARSON 375

Reviews—

The ceaseless wind, John A. Dutton (J. S. Sawyer); *Isotopes of water—a bibliography*, W. K. Summers and Carolyn J. Sittler (J. S. G. McCulloch); *Radioisotopes and global transport in the atmosphere*, I. L. Karol (R. J. Murgatroyd); *Applied climatology*, J. F. Griffiths (K. J. Weston); *Facets of hydrology*, Ed. by J. C. Rodda (J. R. D. Francis) 376

Election to Membership 379

A. A. WHITE—Modified quasi-geostrophic equations using geometric height as vertical coordinate 383

J. R. BATES—Dynamics of stationary ultra-long waves in middle latitudes 397

A E. GILL—Coastally trapped waves in the atmosphere 431

JOHN W. KIDSON—African rainfall and its relation to the upper air circulation .. 441

MICHAEL D. STEVEN—Standard distributions of clear sky radiance 457

BRYAN C. WEARE—Empirical orthogonal analysis of Atlantic Ocean surface temperatures 467

R. A. PLUMB—Angular momentum advection by axisymmetric motions 479

I. HIROTA and J. J. BARNETT—Planetary waves in the winter mesosphere—preliminary analysis of Nimbus 6 PMR results 487

L. M. LESLIE and R. K. SMITH—On the choice of radial boundary conditions for numerical models of sub-synoptic vortex flows in the atmosphere, with application to dust devils 499

JACOB G. KURIYAN, ZVI SHIPPONY and SUBIR K. MITRA—Transmission function for infrared radiative transfer in an inhomogeneous atmosphere 511

STEFAN HASTENRATH—Relative role of atmosphere and ocean in the global heat budget: tropical Atlantic and eastern Pacific 519

Reviews—

Radiative processes in meteorology and climatology, G. W. Paltridge and C. M. R. Platt (G. D. Robinson); *Applied statistics in atmospheric science. Part A: Frequencies and curve fitting*, Oskar M. Essenwanger (A. F. Jenkinson); *Physical principles of micrometeorological measurements*, P. Schwerdtfeger (J. R. Milford); *Wind effects on buildings and structures—Proceedings of the Fourth International Conference*, London, September 1975, Ed. K. J. Eaton (R. Royles) 527

Corrigendum 531

Report of the Council for 1976 533

Election to Membership 549

Obituary Notice 552

B. J. HOSKINS, A. J. SIMMONS and D. G. ANDREWS—Energy dispersion in a barotropic atmosphere 553

D. A. MANSFIELD—Squall lines observed in GATE 569

A. B. PITTOCK—Climatology of the vertical distribution of ozone over Aspendale (38°S 145°E) 575

L. RANDALL KOENIG—The rime-splintering hypothesis of cumulus glaciation examined using a field-of-flow cloud model 585

ALF NYBERG—On air-borne transport of sulphur over the North Atlantic 607

N. L. H. WOOD—A field study on the representativeness of turbulent fluxes of heat and water vapour at various sites in southern England 617

R. F. CHISNELL, J. LATHAM, P. Ryder and I. M. STROMBERG—The electrical structure of an inversion 625

ALAN J. THORPE and TREVOR H. GUYMER—The noctural jet 633

D. E. CARTWRIGHT, J. S. DRIVER and JOYCE E. TRANTER—Swell waves at Saint Helena related to distant storms 655

M. T. COFFEY—Water vapour absorption in the 10–12 μm atmospheric window .. 685

D. A. BENNETTS—A numerical study of the initiation and early development of convection in temperate atmospheres 693

D. S. ZRNIC, R. J. DOVIAK and D. W. BURGESS—Probing tornadoes with a pulse Doppler radar 707

C. WAMSER and H. MÜLLER—On the spectral scale of wind fluctuations within and above the surface layer 721

A. E. CARTE and G. N. MADER—Hailstorms in the Transvaal on 29 November 1972 .. 731

D. v. d. S. ROOS, H. SCHOOLING and J. C. VOGEL—Deuterium in hailstones collected on 29 November 1972 751

S. A. MASLOWE—Weakly nonlinear stability theory of stratified shear flows 769

P. J. MULHEARN—Relations between surface fluxes and mean profiles of velocity, temperature and concentration, downwind of a change in surface roughness 785

S. THWAITES, J. N. CARRAS and W. C. MACKLIN—The aerodynamics of oblate hailstones 803

Notes and Correspondence—

A. B. PITTOCK—Ozone sounding correction procedures and their implications 809

S. J. CAUGHEY and J. C. KAIMAL—Vertical heat flux in the convective boundary layer .. 811

ALBERT J. KOSCIELNY—Comments on the paper 'An analysis of Manley's central England temperature data: I' by T. G. J. Dyer. With reply 815

ERNEST W. PETERSON and NIELS OTTO JENSEN—Comment on 'Boundary layer flow over gentle curvilinear topography with a sudden change in surface roughness' by A. K. Lo. With reply 818

GORDON MANLEY—Annual rainfall in England since 1725: some comments. With reply by J. M. Craddock. 820

Reviews—

Atmosphere-surface exchange of particulate and gaseous pollutants, Erda Symposium Series 38 (A. C. Chamberlain); *The urban costs of climate modification*, Ed. by Terry A. Ferrar (Tony J. Chandler); *Systematic hydrology*, John C. Rodda, Richard A. Downing and Frank M. Law (R. Murray); *The aerospace environment*, T. Beer (W. C. Bain); *Environmental data management*, Ed. by C. H. Oppenheimer *et al.* (J. M. Craddock); *Physical fluid dynamics*, D. J. Tritton (I. N. James); *The clever moron*, R. S. Scorer (R. C. Sutcliffe) 824

Election to Membership 829
